

Biometrics & Privacy in Supermarket Shopping

Exploring the Intersection of Technology, Trust & Ethics in Retail

Project Overview

This research investigates how **biometric technologies (like facial recognition and fingerprint scanning)** are perceived by supermarket customers. It explores the delicate balance between **convenience, privacy, and consumer trust**, offering valuable insights for retailers and policymakers aiming to adopt biometric authentication in ethical, inclusive ways.

Research Objectives

- Assess **public perception** of biometrics in supermarkets
- Explore **privacy concerns** tied to biometric data usage
- Analyze the role of **convenience and trust** in technology acceptance
- Provide **strategic insights** for ethical implementation
- Highlight **demographic influences** (age, education, income)

Research Questions

- How do consumers perceive biometric technologies in supermarkets?
- What specific privacy concerns affect their trust and acceptance?
- What factors (e.g. convenience, age, income) influence these attitudes?

Methodology Framework-

Methodology

- **Approach:** Mixed Methods

- **Quantitative:** Structured surveys using Likert scales
- **Qualitative:** In-depth, semi-structured interviews
- **Sample Size:** Targeting 300 participants across demographics
- **Analysis:** Thematic coding (qualitative) + statistical comparison (quantitative)

Key Findings (Expected Outcomes)

Topic	Presentation Method
Biometric Acceptance Trends	Comparative charts by demographic
Privacy Concerns	Tables categorizing key concerns
Trust & Public Perception	Visuals: word clouds & bar graphs
Convenience vs. Privacy	Heatmaps and opinion scales
Demographic Impact	Cross-tab analysis visuals
Response Bias Mitigation	Empirical validation methods

Highlights

- High acceptance among younger users prioritizing convenience
- Strong privacy concerns from older demographics & data-conscious users
- Personalized pricing triggers ethical concerns
- Trust, transparency, and education are crucial to adoption
- Recommendations provided for retailers and policymakers
